

# Planning a **safe** recovery for the National Park

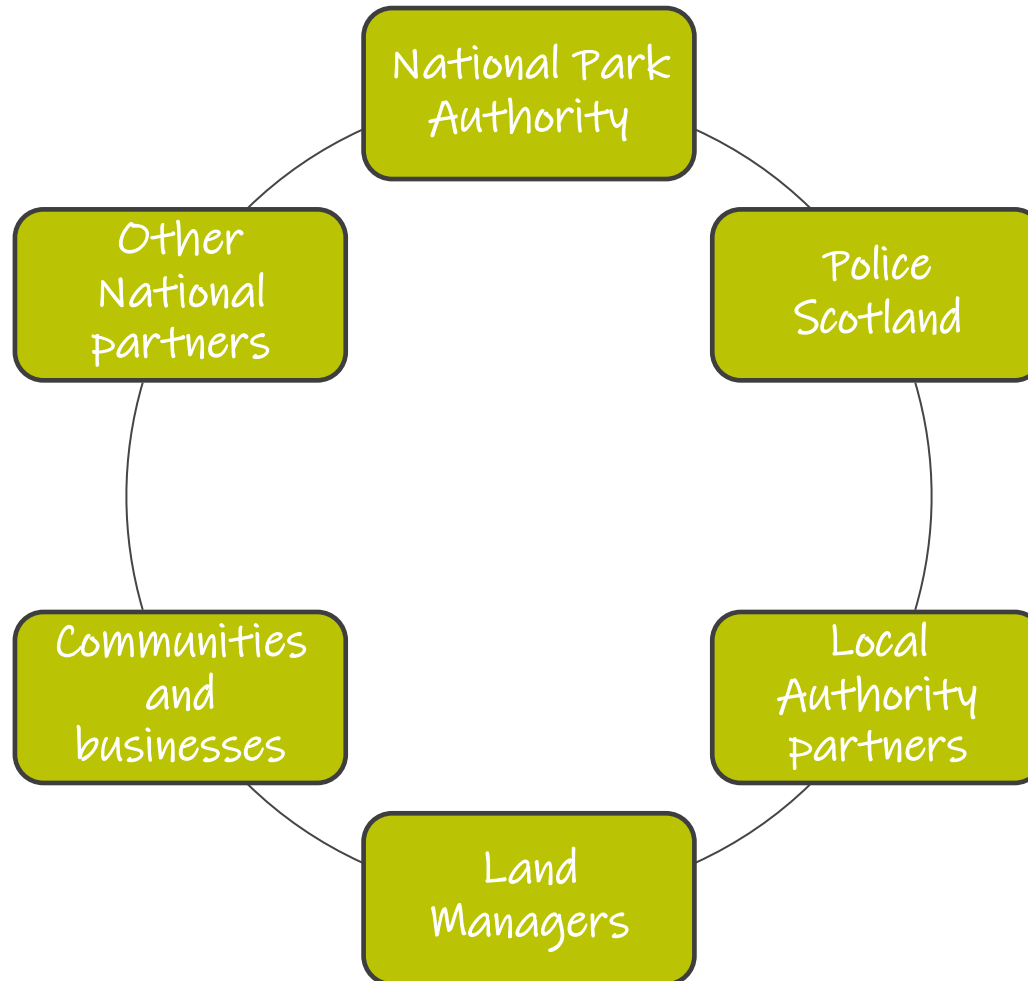

**DRAFT FOR DISCUSSION**

20<sup>TH</sup> MAY 2020

As we prepare for the easing of lockdown, we begin our journey to 'recovery'

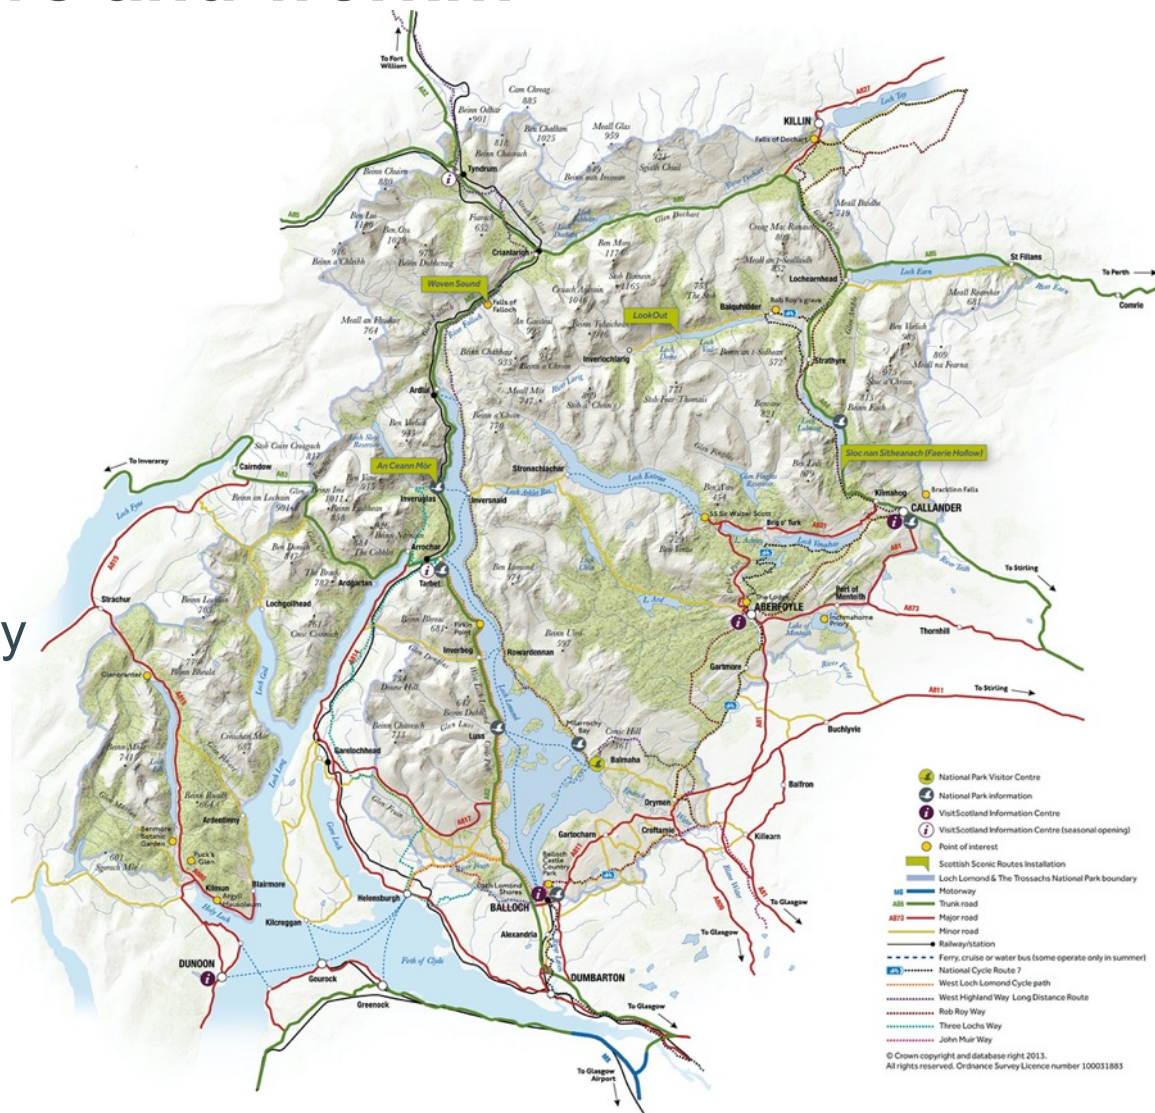

# Planning a safe 'reopening' of the National Park requires collaboration

It is crucial that  
**safety** and **respect**  
are at the heart of  
our collective  
approach

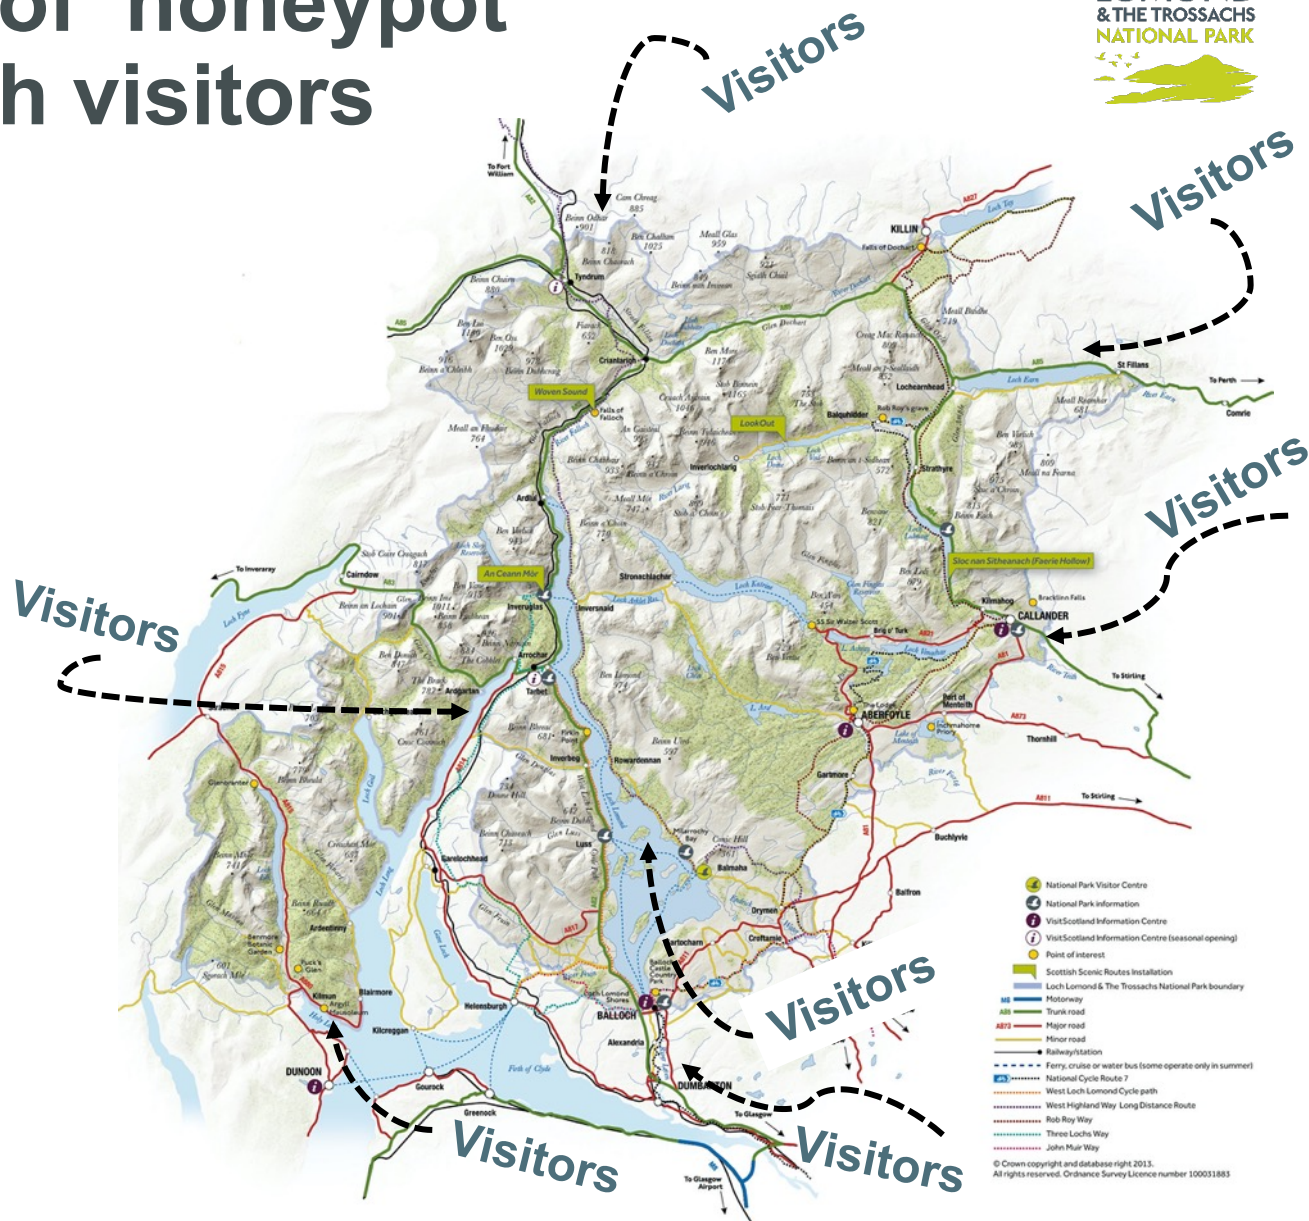

# The National Park is a place where people live and work...

- c.15,000 residents
- 4m+ visitors per year
- Half of Scotland's population within an hour's drive
- An economy that usually thrives on tourism
- Visitor pressures pre-COVID-19 already an issue in the busiest areas

# ...with lots of 'honeypot' popular with visitors

- A82 and West Loch Lomond corridor
- East Loch Lomond
- Callander and the A84 corridor
- The wider Trossachs area
- Our most popular lochs, rivers and hills

# What do we want to achieve by working together on a safe recovery plan?

1. First and foremost, we want the National Park to be a **safe place to live, work and visit**
2. Our collective experience will help **inform Scottish Government reopening plans** and provide ongoing local insight
3. We want to have **co-ordinated approach to 're-opening'** in line with Scottish Government guidance
4. We will share **clear and aligned messaging** to the public
5. There will be **good communications** between all partners involved
6. Partners will be able to **share learning about how to operate safely** in a socially-distanced world

# Some of the basic considerations for 'reopening' the National Park

Parking and traffic management

Waste collection and litter prevention

Toilets/hygiene considerations

Clear social distancing guidance and measures
